Dear,

As an industry veteran, I am at present looking for just the sort of Network Engineer position that you are currently advertising on the Dayjob.com website.

Through my ability to implement basic as well as complex network solutions, I appear to meet all of your requirements as a candidate. Something else that you will find attractive in me is my ability to fully implement every bit of a technical solution to a client in accordance with any agreed technical design specifications.

During my career I have gained a long list of transferable skills that are directly related to your position. These competencies include my ability to;

- Follow standard practices and procedures in analysing networking issues.
- Produce accurate network installation documentation.
- Provide clients with pre-sale, installation and post-sale network support.

For additional information about my capabilities please view my attached resume.

Right now, I would like to join a company where people love coming to work because they feel like you're part of something special. I would welcome the chance of an interview, where we would be able to discuss in greater detail the value and strength I can bring to your already successful company.

I am willing to be put through my paces and prepared to undergo any test or exam you want to put me through to. I thank you very much for your time and I eagerly look forward to hearing from you.

Yours sincerely,

James Branson
